SECTION I – CHEMICAL PRODUCT IDENTIFICATION

Product Name: Anhydrous HCl

Product Overview: Anhydrous hydrogen chloride, also referred to as hydrogen chloride gas, is a clear, colorless gas with an extremely sharp odor. “Anhydrous” means dry or without water. Anhydrous hydrogen chloride is extremely attracted to water and when exposed to air, quickly reacts with the moisture in the air forming fumes, which are a mist of hydrochloric acid. NIACET® anhydrous hydrogen chloride is sold as liquefied gas. Aqueous hydrochloric acid is a highly corrosive liquid that is formed upon mixing anhydrous hydrogen chloride with water or moisture in the air. It emits a pungent odor and strong fumes in moist air. The color ranges from clear to slightly yellow.

Chemical Synonyms: Hydrochloric Acid; Anhydrous hydrochloric acid; Chlorohydric acid; Hydrochloric acid gas; Hydrochloride; Muriatic acid; HCl; Hydrochloric acid, anhydrous; Hydrogen-chloride-anhydrous-; Acide chlorhydrique; Acido cloridrico; NA 1789; UN 1789; UN 2186; Anhydrous hydrogen chloride; Hydrogen chloride (acid); Marine acid; Soldering acid; Spirits of salts

Emergency Contact: (800) 424-9300; (202) 483-7616

SECTION II – HAZARDS IDENTIFICATION

Physical State: Gas. [COLORLESS TO SLIGHTLY YELLOW LIQUEFIED COMPRESSED GAS WITH AN IRRITATING ODOR; OR COLORLESS FUMING GAS WITH A PUNGENT, IRRITATING ODOR]

Emergency Overview: DANGER! CAUSES SEVERE RESPIRATORY TRACT, EYE AND SKIN BURNS. HARMFUL IF INHALED. MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA. CONTENTS UNDER PRESSURE.

Do not puncture or incinerate container. Do not breathe gas. Do not get on skin or clothing. May cause target organ damage, based on animal data. Use only with adequate ventilation. Keep container closed. Do not get in eyes, on skin or on clothing. Avoid breathing gas. Wash thoroughly after handling.

Contact with rapidly expanding gases can cause frostbite.

Target Organs: May cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.

Routes of Entry: Inhalation Dermal Eyes
Potential acute health effects

**Eyes** Severely corrosive to the eyes. Causes severe burns. Contact with rapidly expanding gas may cause burns or frostbite.

**Skin** Severely corrosive to the skin. Causes severe burns. Contact with rapidly expanding gas may cause burns or frostbite.

**Inhalation** Toxic by inhalation. Severely corrosive to the respiratory system.

**Ingestion** Ingestion is not a normal route of exposure for gases

Potential chronic health effects

**Target organs** May cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.

**Medical conditions aggravated by over-exposure** Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

See toxicological information (Section 11)

SECTION IV – FIRST AID

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Eye contact** Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

**Skin contact** In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Frostbite** Try to warm up the frozen tissues and seek medical attention.
EMERGENCY PHONE NUMBER: (800) 424-9300; (202) 483-7616

**Inhalation**
Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

**Ingestion**
As this product is a gas, refer to the inhalation section.

**SECTION V – FIRE-FIGHTING**

*Flammability of the Product*  
Non-flammable

*Products of Combustion*
Decomposition products may include the following materials: halogenated compounds

*Fire-fighting Media and Instructions*
Use an extinguishing agent suitable for the surrounding fire.

Apply water from a safe distance to cool container and protect surrounding area. If involved in fire, shut off flow immediately if it can be done without risk.

Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.

**Special Protective Equipment for Fire-Fighters**
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**SECTION VI – ACCIDENTAL RELEASE**

**Personal Precautions**
Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

**Environmental Precautions**
Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

**Methods for Clean-up**
Immediately contact emergency personnel. Stop leak if without risk.

Note: see Section I for emergency contact information and section XIII for information on waste disposal.

**SECTION VII – HANDLING AND STORAGE**

**Handling**
Use only with adequate ventilation. Wash thoroughly after handling. High pressure gas. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Do not get in eyes, on skin or on clothing. Keep container closed. Do not get on skin or clothing. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

**Storage**
Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).
EMERGENCY PHONE NUMBER: (800) 424-9300; (202) 483-7616

SECTION VIII – EXPOSURE CONTROL/PERSONAL PROTECTION

**Engineering Controls**

Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

**Personal Protection**

**Eyes**  Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

**Skin**  Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory**  Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

**Hands**  Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

**Personal Protection for Large Spill**  Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product. Full chemical-resistant suit and self-contained breathing apparatus should be worn only by trained and authorized persons.

SECTION IX – PHYSICAL DATA

- **Molecular weight:** 36.46 g/mole
- **Molecular formula:** Cl-H
- **Boiling/condensation point:** -85°C (-121°F)
- **Melting/freezing point:** -113.9°C (-173°F)
- **Critical temperature:** 51.5°C (124.7°F)
- **Vapor pressure:** 613 (psig)
- **Vapor density:** 1.3 (Air = 1)
- **Specific Volume (ft³/lb):** 10.5263
- **Gas Density (lb/ft³):** 0.095

SECTION X – STABILITY AND REACTIVITY

- **Stability and Reactivity:** The product is stable.
- **Incompatibility with various substances:** Extremely reactive or incompatible with the following materials:
  - Alkalis
  - Moisture
  - Highly reactive or incompatible with the following materials:
  - Metals
- **Hazardous Decomposition Products:** Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- **Polymerization:** Under normal conditions of storage and use, hazardous polymerization will not occur.

**Chronic Effects on Humans**

Carcinogenic Effects: A4 (Not classifiable for humans or animals.) by ACGIH, 3 (Not classifiable for humans.) by IARC.

May cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.

**Other Toxic Effects on Humans**

Extremely hazardous by the following route of exposure: of skin contact (corrosive), of eye contact (corrosive), of inhalation (lung corrosive).

**Specific Effects**

- Carcinogenic Effects: No known significant effect or critical hazards
- Mutagenic Effects: No known significant effect or critical hazards
- Reproduction Toxicity: No known significant effect or critical hazards

SECTION XII – ECOLOGICAL INFORMATION
