

# Progusta MA Anhydrous Powder

## Magnesium acetate anhydrous food grade

Progusta MA magnesium acetate food grade is available as a free flowing white powder (anhydrous).

### PRODUCT PROPERTIES

Product name	Magnesium Acetate anhydrous
Formula	$(\text{CH}_3\text{COO})_2\text{Mg}$
Molecular weight	142.40 g/mol
CAS No.	142-72-3
EINECS No.	2055549
HS-code US	2915.29.5000
HS-code EU	2915.29.00

### Application

Progusta MA magnesium acetate is used as a mineral source for magnesium. Minerals are considered to be nutrients, not having a technological function in the food, but are rather added to foods for the nutritional and physiological requirements of the consumer. Progusta MA can be added to foods and food supplements for magnesium fortification.

### Legislation

Magnesium acetate conforms to the EU (2002/46/EC) as a mineral source to food supplements and to EU (EC 1925/2006) as a mineral source to foods.

Please check local legislation for the exact dosage levels and allowed applications.

### Stability

Magnesium Acetate is stable for 2 years from date of production. Physical stability and appearance can change before the end of shelf-life if the product is not stored in closed original packing, kept dry and at room temperature or if the pallets are stacked.

### Handling

Product has no classification. Always check the Safety Data Sheet and label before using the product.

### Packaging

Magnesium Acetate is packed in 25 kg polyethylene lined paper bags.

### Safety precautions

Please see the Safety Data Sheet before handling the material.

This product is produced in the Netherlands.
